Superior Desing and Ease of Use

Smart Slide Drawer Systems, produced due to SAMES's experience in developing innovative products and its cutting-edge technologies, provide furniture with extra movement, which is the most significant factor in modern living spaces.

Smooth and Silent Movement

The state-of-the-art technology used in Smart Slide Drawer Systems adds elegance to opening and closing drawer features . Perfection of its technology ensures silent and smooth motion.

Due to the synchronization system, used in Smart Slide drawers, desired user's comfort can now be attained.

The Secret of Comfortable-to-use Drawer Systems

Adapting soft close mechanism in Smart Slide Drawer Systems, developed with cutting-edge technology, provides drawers with very smooth and closing feature. With such impressive opening-closing movements, Smart Slide Drawer Systems add innovative and elegant touch to the living space.

Single and Full Extension Options

Smart Slide Drawer Systems meet expectations for advanced design creation with full and single extension options, which are developed with the purpose of meeting various design needs.

Soft-Close Push-Open Version

Now Smart Slide generation is integrated into Soft-Close and Push-Open system at the same time. It means end user can open the drawer by only touching the front panel and close the drawer by slightly pulling the panel, and the drawer will close by itself. With this feature the drawer is upgraded to a very high quality and sophisticated design for the Interior Design world.

*push*open

Push-Open Version

Smart Slide Drawer Systems' "PushOpen" function simplifies utilization of non-handle drawers with single touch movement.

*push*open

Lock-Fix and Pin-Fix Mechanism Options

Lock-Fix mechanism, was especially designed for quick and flexible installation process of Smart Slide Drawer Systems. At the same time "Pin-Fix system" was particularly developed for industrial furniture producers to ensure ease and safety during installation.

With wide drawer size alternatives within a range of 250 mm to 600 mm different requirements can be met, which ensures different solutions during furniture production. The possibility to lock as tight as desired ensures safety during drawer utilization.

Excellent Quality

Smart Slide Drawer Systems' technology with 30 kg loading capacity has globally proved its quality with the success to be certified by LGA , whereby LGA is one of the most important standardization institutions in Germany. Smart Slide was tested in SAMET's privately owned R&D Institute by performing minimum 80,000 opening-closing cycles, which proves its quality is recognized by European quality organizations.
